

INTAKE & ADMISSION

The first step in the admission process is a phone call to our Admission Coordinator, Keith Kohley, at 808-242-9733, extension 32. He will talk with you and, if you want, your family members about your needs and treatment options. Keith will do an intake screening to help determine how to best help you with recovery.

Once it is determined the best treatment option for you, Keith will work with the staff of the treatment program to facilitate admission.

If treatment can occur at our clinic, Keith will let you know when you may enter treatment and arrange for orientation to the program.

If residential treatment is indicated:

- You will need a physical exam by a physician prior to admission and Keith will help set that up for you.
- At that appointment, if medications are indicated to assist with detoxification, you will get the prescription from the physician and have it filled prior to admission.
- A TB clearance within the last year is required and if you have not had that, Keith will assist you in arranging for that test.

As soon as a bed is available, your admission will be scheduled.

INTENSIVE OUTPATIENT SERVICES

SUBSTANCE ABUSE TREATMENT

"helping to create brighter futures"

ALOHA HOUSE, INC.— OUTPATIENT SERVICES—SUBSTANCE ABUSE TREATMENT

At Aloha House's Out-patient Services Clinic we offer Substance Abuse Treatment for the individual,

group and family counseling to assist people in effective recovery from addictions. We offer programs of group counseling in the morning or evenings to make it easy for someone to have a job and attend the program. The groups are confidential and facilitated by experienced and qualified addiction counselors.

You will be treated with respect and dignity and supported to find your way through your problems and concerns. We view the recovery process as multifaceted involving group sessions, family sessions and individual sessions, giving you many opportunities to deeply explore your issues and find your personal path of recovery.

You will receive a thorough and in-depth assessment to help you identify strengths and recovery needs. You will work with your counselor on planning your recovery and determining what services you need to help support your recovery.

Recovery is an ongoing process with treatment as the first step. We will help you identify ongoing support networks to help you maintain your recovery after you leave treatment. This will include 12 Step or other recovery support services, aftercare with Aloha House, ongoing individual sessions or other support as identified by you and your counselor.
